

# ATTIX 40 & ATTIX 50

*Wet and dry vacuum cleaners*

## Nilfisk ALTO

*Why Compromise*

# ATTIX 40 & ATTIX 50

## Wet and dry vacuum cleaners

### Filter Cleaning As Standard

Manual Push&Clean filter cleaning on all ATTIX 40 & 50 PC models, and automatic XtremeClean filter cleaning on all ATTIX 50 XC models.

### High Performance & Capacity

Container volumes from 40-47 litres mean the ATTIX 40 & 50 range can handle most applications. NEW improved turbine design provides high suction performance.

### Superior Wet Dirt Collection

All NEW ATTIX vacuums include a PET filter which can be washed and is very hard wearing. To improve wet dirt collection the NEW range also features a 'fleece' filter bag. This NEW bag is more durable to wet dirt which means easier disposal.

### High Mobility

The ATTIX range is highly mobile with reinforced front castors providing excellent movement along all surfaces

ATTIX 40-01 PC INOX shown

ATTIX 50-21 XC shown

### Cable & Accessory Storage

Cable grip for easy cable storage, plus on-board storage for extension tubes and accessories.

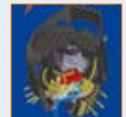

### Auto On/Off Socket for Power Tools (-21 versions)

Electric Power Tool dust extraction socket on all '-21' models mean the vacuum will start and stop when the tool is operated, reducing noise and power waste. The speed control also gives you control of the suction power and noise level.

**Push&Clean**  
Filter Cleaning System

- 1) Block the inlet fitting or hose
- 2) Push and release the filter cleaning button to activate airpulses which clean the filter from the inside out.

**XtremeClean**  
Automatic Filter Cleaning System

The filter is automatically cleaned while the machine is working. Automatic air pulses clean the filter from the inside out giving superior results.
